

Error message during GI posting “Message No. M7146” note 305582

Error message during GI posting: **EKPO-SOBKZ=E; EKPO-UMSOK=_; EKPO-KZBWS<>_ EKPO-KZVBR<>E (Note 305582) not supported (check your entry).**

Message No. M7146

GI Posting is not possible.

The screenshot shows the SAP 'Goods movement: Error log' window. The main table contains the following data:

Type	MT	Area	Msg	Item	Message Text	LTxd	Material	Description	Div.qty	SU	Batch
E	M7	146	10		EKPO-SOBKZ=E; EKPO-UMSOK=_; EKPO-KZBWS<>_ EKPO-KZVBR<>E (Note 305582) not supported (check your entry)		51105620	KF RESISTOR UNIT	1,000	EA	

Root cause:

This is standard SAP behavior which is related to field **Individual/coll.** in material master data MRP4 view.

The screenshot shows the 'BOM explosion/dependent requirements' view in SAP. The 'Individual/coll.' field is highlighted in yellow and contains the value '2'. Other fields include 'Selection method', 'Component scrap (%)' (0,00), 'Requirements group', 'MRP dep.requirements', and 'Version Indicator'.

Solution:

1. Delete Delivery
2. Delete according PO Item

- 3. Change 'Individual/coll.' to blank on **MRP4** tab
- 4. Create a new PO Item
- 5. Create a new Delivery

How to check if a new PO or OBD will not have similar issue:

Field **EKPO-KZVBR**, in a new PO should be empty
