

# Material Number Format in SAP

Goto IMG path>Logistic general>Material Master>Basic settings>Define output format of article Numbers

or directly check in Tcode: OMSL

or see table V\_TMCNV in transaction SM30.

where you will see the "Article No. Length:18 (If not defined set there) and check in your template also. In Standard SAP Maximum 18 characters are allowed.

The screenshot displays the SAP 'Material Number Format' configuration interface. The main window is titled 'Display View "Material Number Format": Details'. It contains a section 'Material Number Display Options' with fields for 'Material No. Length' (set to 10), 'Material Number Template', and checkboxes for 'Lexicographical' and 'Leading Zeros'. A red box highlights the '10' in the 'Material No. Length' field, with a red arrow pointing to a search window. The search window, titled 'Length of the material number (2) 1 Entry found', shows a table with one entry: '1' to '18' with the description 'Possible length of material number'.

From	To	Short Descript.
1	18	Possible length of material number
