Summary

I am a highly experienced SAP professional with over 6 years of expertise in supply chain, logistics and warehouse management. Currently serving as a SAP SCM Logistics Team Lead and SAP SCM Logistics Execution Solution Architect at Mettler-Toledo International, I am passionate about optimizing supply chain processes and driving innovation.

As a Team Leader, I have been responsible for mentoring and guiding a team of logistics professionals, ensuring the timely and high-quality delivery of projects. I have also collaborated with cross-functional teams to align logistics processes with overall supply chain goals and have driven process improvement initiatives.

In my role as an SCM LE Solution Architect, I have designed and developed end-to-end logistics execution solutions, with a focus on system integration, scalability, and alignment with supply chain strategies. I have identified opportunities for automation and digitalization to enhance operational efficiency and have successfully managed logistics execution projects.

My proficiency in configuring and customizing SAP supply chain management software, including SAP SD, SAP MM, SAP WM/EWM and SAP LE-TRA, has been instrumental in delivering successful projects.

Throughout my career, I have honed my skills in SAP systems, ABAP Debugging, test planning, release management, knowledge acquisition, management consulting and various aspects of logistics and warehouse operations.

I stay at the forefront of industry trends, emerging technologies, and best practices in logistics execution to ensure that I contribute to the continued success of my organization.

Feel free to connect with me to discuss how I can bring my expertise to your supply chain, logistics and warehousing projects.

Experience
